*The Future of Population in Asia* brings together research on population and health conducted in recent years by staff members at the East-West Center and their colleagues. Much of the numerical data used in this report is taken from *World population prospects: The 2000 revision*, released by the United Nations in 2001.

Sidney B. Westley, Communications Specialist, largely compiled the material presented here with professional and technical guidance from Robert D. Retherford, Senior Fellow and Coordinator, Population and Health Studies. Authorship of individual chapters is as follows:

**Introduction and Overview.** *Robert D. Retherford*

**Fertility and Family Planning.** *Robert D. Retherford and Sidney B. Westley*

**Tradition and Change in Marriage and Family Life.** *Minja Kim Choe, Sidney B. Westley, and Robert D. Retherford*

**The Changing Status of Women in Asian Societies.** *Sidney B. Westley*

**Asia's Changing Youth Population.** *Sidney B. Westley and Minja Kim Choe*

**HIV/AIDS in Asia.** *Tim Brown*

**Asia's Aging Population.** *Sidney B. Westley and Andrew Mason*

**Population Change and Economic Development: Success Stories from Asia.** *Andrew Mason and Sidney B. Westley*

**Population, Natural Resources, and Environment.** *Vinod K. Mishra*

This publication is the result of a broad group effort. In February 2002, Robert D. Retherford, Andrew Mason, and Tim Brown made presentations to policy audiences in New York and Washington, D.C., based on the material published here. At the East-West Center, Sally Dai provided research assistance, Loraine Ikeda proofread the report and managed its distribution, Phil Estermann provided administrative support, and Karen Yamamoto provided fiscal support. Karen Oppenheim Mason, former Coordinator, Population and Health Studies, helped conceptualize the project.

Several scholars provided background material or comments on earlier drafts. These include Peter Xenos and Wiwat Peerapatanapokin at the East-West Center, Noriko O. Tsuya at Keio University, Tokyo, Larry L. Bumpass at the University of Wisconsin, Madison, Ronald R. Rindfuss at the University of North Carolina, Chapel Hill, Herbert Smith at the University of Pennsylvania, and Mark W. Rosegrant at the International Food Policy Research Institute, Washington, D.C. Responsibility for any errors, however, rests solely with the chapter authors.

Publication of *The Future of Population in Asia* was made possible by a grant from the Bill and Melinda Gates Foundation.
