Panel 2.3: EPDP Session--Power Sector in the Philippines: Theory, Policy, and Practice

Principles of Electricity Policy with Philippine Applications

Electricity policy in many economies such as the Philippines is charged with multiple objectives, including sustainability, inclusivity, the promotion of renewability and many more. Unless these conflicting objectives can be reconciled, the pursuit of one will detract the pursuit of another. The study will elucidate the nature of these and other objectives and provide a unifying framework by extending the traditional view of efficiency.
