Economy

Malaysia's National Debt

Malaysia National Debt:

RM490,000,000,000

53.7% of GDP or RM16,700 for every man woman and child in Malaysia.

If we stacked RM1 notes to show the debt, it would be 17,000 km high longer than the distance from KL-New York.

Today we have debt fueled economic growth with almost everything going up. The government is spending like crazy to attempt to regain their 2/3rds majority with NO NEW TAXES. How long can that last do you think?

Well we can thank future unborn generations of Malaysians for their help paying all this back one day. There seems to be nothing wrong with living the good life and spending more than you earn consistently year after year until suddenly people stop lending you money! Just ask Greece, or Cyprus, or Ireland, or Iceland, or very very soon Japan....

So you should be feeling great now. The kind of great you feel when you go out on a big shopping binge, max out your Visa bill but haven't received any statements yet! This is why we need government to be accountable for how it spends your money!

The Future

Reform and Governance: Fighting Corruption and Crime

Economic Policies: Regaining Fiscal Strength

Social Policies: Education, Healthcare and Public Priorities

Vision 2020

Foreign Policy

Conclusion

Short term problematic if divisive politics continue.

Longer term bullish.
